PROFILE

Motivated Software Engineering student and aspiring full stack developer with hands on experience building real world projects such as e-commerce systems, library management platforms, and responsive web applications. Skilled in JavaScript, React/Next.js, Node.js, Express, and database design. Passionate about learning, improving through practice, and working in a professional environment where I can contribute to meaningful projects and grow as a software engineer

EDUCATION

Adama Science and Technology University [🔗](#)
Bachelor of Software Engineering

2023 – 2028
Adama , Ethiopia

PROJECTS

Library Management System [🔗](#)

Designed and implemented a full-stack web application to manage books, users, and borrowing records. Built RESTful APIs using Node.js and Express, integrated a React frontend, and implemented CRUD operations with MongoDB. Focused on clean architecture, usability, and scalable backend design.

Blog Application

Built a blogging platform using React that allows users to create, edit, and delete posts. Emphasized dynamic content rendering, component-based architecture, and smooth user experience.

E-Commerce [🔗](#)

A specialized e-commerce platform built with **Next.js & TypeScript**, featuring a dual interface for guests vs. members, secure JWT authentication, and a custom Admin Dashboard for real time inventory and event management

SKILLS

Language — Python | c++ | Javascript

Technical Skills — Data Structure and Algorithms | RESTful API | Web Development

Tools — Git and GitHub | VScode | Postman

Frameworks — React | Node.js | Express.js | MongoDB

Soft Skills — Communication | Punctuality | Team Collaboration | Problem Solving

CERTIFICATES

- ASTU MSJ Bootcamp [🔗](#)
- Digital Literacy System [🔗](#)
- Working in a Digital World [🔗](#)
- Job Application Essentials [🔗](#)
